

Part 602 – Conferences of the National Cooperative Soil Survey

Subpart A – General Information

602.00 Definition

A. The National Cooperative Soil Survey (NCSS) coordinates technically and operationally at national, regional, and State levels. Its activities relate to the technology for the collection, management, and presentation of information about the properties, patterns, and responses of soils and to other joint concerns, such as training and coordinated research and operations. Workshops, meetings, and conferences at each level discuss and resolve concerns, proposals, and recommendations for the cooperative soil survey.

B. The National Cooperative Soil Survey Conference

The national conference primarily discusses subjects of national concern to NCSS. The Soil Science Division director calls the conference in odd-numbered years after consulting with the conference steering committee. Attendees to the conference include national representatives of cooperating agencies and institutions. The director invites other interested foreign and domestic groups and individuals, and particularly principal users of soil surveys, to participate. NRCS publishes the proceedings of the conference and distributes copies to the cooperators in NCSS. The conference bylaws specify the objectives, membership, and committees. Refer to part 602, subpart B, section 602.10, for the bylaws of the NCSS Conference.

C. NCSS Regional Conferences

The NCSS regional conferences primarily discuss subjects of regional concern. Each region convenes a soil survey conference in even-numbered years. The four regions correspond to the agricultural experiment station regions and are the North Central, Northeast, Southern, and Western. State and regional soil survey leaders, some national leaders, and other invited persons attend the conference. The conference steering committee publishes the conference proceedings and distributes copies to regional NCSS cooperators and others. The conference bylaws specify the objectives, membership, and committee responsibilities. Refer to part 602, subpart B, sections 602.11, 602.12, 602.13, and 602.14, for the bylaws of the four NCSS regional conferences. Guidance on conducting NCSS regional conferences is provided in section 602.15.

D. NCSS State Conferences

The NCSS State conferences primarily discuss subjects of State concern. The NRCS State soil scientist annually convenes a State conference. Attendees include cooperators and others who contribute to NCSS activities and principal users of soil survey information within the State. Working agreements govern activities of NCSS within the State.

E. Joint Regional or State Conferences

Joint regional or State conferences between two or more regions or States may be held with the agreement of the participants involved.
