EASEMENT BOUNDARY SURVEY FIELD REVIEW MEMORANDUM TO THE FILE

RE: Easement Boundary Survey Field Review Memorandum to the File

Agreement #: \_\_\_\_\_ Date of Field Review: \_\_\_\_\_

Easement or Landowner Name: \_\_\_\_\_

County \_\_\_\_\_ State \_\_\_\_\_

Name and Affiliation of Individuals Present during the Field Review: (please print)

As the designated representative for NRCS, I met onsite with the landowner regarding the \_\_\_\_\_ [NRCS Easement Program] boundary survey on the above referenced NRCS easement program enrollment. We have carefully reviewed the easement boundary maps and markers and attest to the following:

(1) Area delineated with permanent markers is the area that the landowner intends to place under easement.                      Yes                      No

Comments:

(2) Area delineated with permanent markers is the area identified and agreed to by NRCS.                      Yes                      No

Comments:

(3) The described ingress and egress route is described and mapped as required in the NRCS land survey specifications statement of work for easement boundary surveys.                      Yes                      No

Comments:

(4) Monuments and witness posts have been installed as shown on the survey and lines have been marked, as required in the NRCS land survey specifications statement of work for easement boundary surveys.                      Yes                      No

Comments:

We agree that the surveyed easement area, as monumented and marked, is the area on which the landowner intends to convey a conservation easement to the United States of America by and through the Natural Resources Conservation Service. We agree that the ingress and egress route provides sufficient physical access and is described and mapped on the easement boundary survey.
