

Using this Table: States and the Easement Acquisition Branch must refer to this table when reserving, obligating, or making payment on Inflation Reduction Act (IRA) easement program activities with IRA funds. The “Program Code*” portion of the work breakdown structure (WBS) element that must be used is based on the Farm Bill under which the easement, 30-year contract, or 10-year contract will be enrolled. To allow for proper reporting of costs associated with enrollments IRA, a WBS that contains the appropriate specific program code must be maintained through the life of the enrollment, including all associated and subsequent obligations to that enrollment, to the extent practicable. For non-IRA funded easements, see NB 300-23-3.

Note: For the easement programs identified below, a unique WBS element must be created prior to tentatively selecting an agreement for funding and submitting a funds reservation request in National Easement Staging Tool (NEST).
