

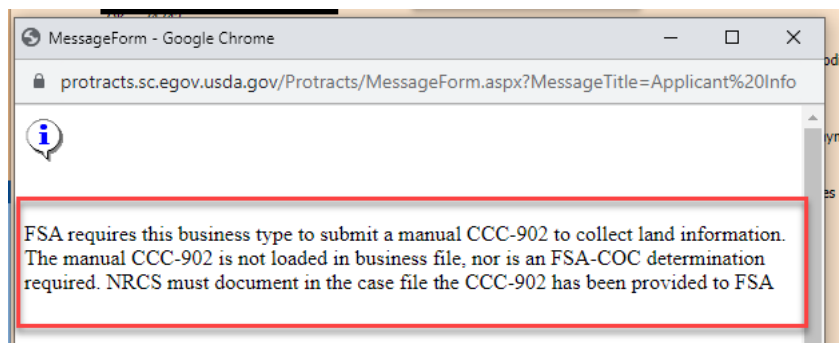

## Exhibit 324.10 – ProTracts Automation Supporting Review of Form CCC-902 Filing Requirement for NRCS Program Applicants and Participants

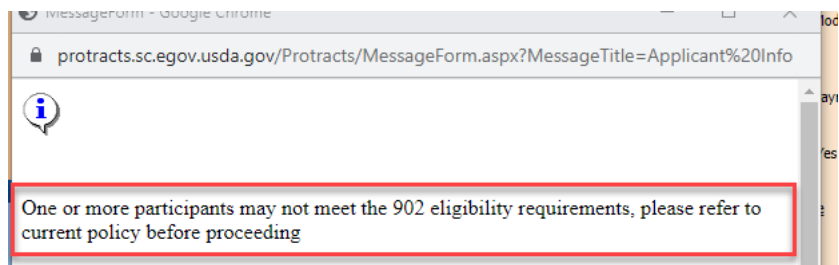

At this time, CCC-902 status is auto-populated from the FSA Business File into Fund Manager. ProTracts development will add a user interface to display the results and warn against certain actions based on the returned status. Until then, NRCS staff must ensure compliance with program policies and requirements by reviewing the client’s eligibility information found in the FSA Business File.

After opening a ProTracts application or contract, users may see one of the following messages displayed.

- For Business type 20 Indian Tribal ventures:

- For all other business types:

Currently, the presence or absence of either message does not indicate compliance with CCC-902 filing requirements.

Future enhancements to ProTracts will include:

- Warning messages only if one or more participants have a filing status other than “determined”
- Display of CCC-902 summary results on the participant info page and on the Fund Manager eligibility summary.
- Display of CCC-902 filing status in the Fund Manager eligibility screen
- Ability to update the eligibility service call in real time by using the “Update Eligibility” button on the participant info page

This functionality is expected by January 2024. States will be notified when new functionality becomes available.
